

## Academic Course Specification Form

### استمارة توصيف المقرر الأكاديمي

#### القسم الخاص بالطالب Section Concerning the Student

|                                           |                                    |                                                              |
|-------------------------------------------|------------------------------------|--------------------------------------------------------------|
| 1. Course Code:                           | MATHS 233                          | 1. رمز المقرر:                                               |
| 2. Course Title                           | CALCULUS III                       | 2. اسم المقرر:                                               |
| 3. College:                               | College of Science                 | 3. الكلية:                                                   |
| 4. Department:                            | Department of Mathematics          | 4. القسم:                                                    |
| 5. Academic Program:                      | Bachelor of Science in Mathematics | 5. البرنامج الأكاديمي:                                       |
| 6. Course Credits:                        | 4-0-4                              | 6. عدد الساعات المعتمدة:                                     |
| 7. Course NQF Level                       | 7                                  | 7. مستوى المقرر وفقاً للإطار الوطني للمؤهلات:                |
| 8. Notional Hours:                        | 178                                | 8. عدد الساعات الافتراضية:                                   |
| 9. NQF Credits                            | 18                                 | 9. عدد الساعات المعتمدة للمقرر وفقاً للإطار الوطني للمؤهلات: |
| 10. Prerequisite:                         | MATHS 132                          | 10. المتطلب المسبق للمقرر:                                   |
| 11. Lectures Timing & Location:           | TBA                                | 11. وقت المحاضرة ومكانها:                                    |
| 12. General Mode of Teaching and Learning | Tranditional تقليدي                | 12. النمط العام للتعليم والتعلم:                             |
| 13. Course Coordinator:                   | TBA                                | 13. منسق المقرر:                                             |
| 14. Course Instructor:                    | TBA                                | 14. مدرس المقرر:                                             |
| 15. Office Hours and Location:            | TBA                                | 15. الساعات المكتبية ومكانها:                                |
| 16. Instructor's Email:                   | TBA                                | 16. البريد الإلكتروني لمدرس المقرر:                          |
| 17. Academic Year:                        | Click or tap here to enter text.   | 17. السنة الأكاديمية:                                        |
| 18. Semester:                             | First Semester الفصل الأول         | 18. الفصل الدراسي:                                           |

|                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                        |                                                                                            |

Description of Topics Covered:                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                        | 25. وصف الموضوعات التي ينبغي تناولها:                                                      |
| Topic Title<br>(e.g. chapter/experiment title)<br>الموضوع                                                                                                                                                                                                                                                                                                | Description<br>التفصيل                                                                                                                                                                                                                 |                                                                                            |
| Chapter 12: Vectors & the Geometry of Spaces                                                                                                                                                                                                                                                                                                             | The chapter introduces the vectors and coordinate systems in 3D space. Operation on vectors. Dot and Cross Products. Lines, planes and surfaces in space.                                                                              |                                                                                            |
| Chapter 13: Vector Functions                                                                                                                                                                                                                                                                                                                             | The chapter covers vector-valued functions. Calculus of vector functions.                                                                                                                                                              |                                                                                            |
| Chapter 14: Partial Derivatives                                                                                                                                                                                                                                                                                                                          | The chapter introduced the function of several variables and extended the basic idea of differential calculus to such functions (differentiation, tangent planes, finding the extreme values).                                         |                                                                                            |
| Chapter 15: Multiple Integrals                                                                                                                                                                                                                                                                                                                           | The chapter introduced the double and triple integrals. Finding area and volume using double and triple integrals. Evaluating double integral using polar coordinates and triple integrals using cylindrical and spherical coordinates |                                                                                            |
| Chapter 16: Vector Calculus                                                                                                                                                                                                                                                                                                                              | The chapter introduced the calculus of vector fields, particularly the line integral. Fundamental Theorem of calculus, and Green's Theorem. Curl and Divergence Surface Integral. Stokes' Theorem                                      |                                                                                            |

| 26. Weekly Schedule |                 |                                                                                                                                  | 26. الجدول الأسبوعي:                            |                                                                          |

| Students are to observe the highest level of honesty and academic ethics in pursuit of their academic goals as per UOB Regulations of Student Conduct and Academic Integrity, <a href="#">Anti-plagiarism Policies</a> , and <a href="#">Students' Rights and Responsibilities Handbook</a> . The consequences for cheating, plagiarism, unauthorized collaboration, and other forms of academic dishonesty can be very serious and will be dealt with as per the aforementioned policies and regulations. |  | يعتبر الصدق والنزاهة عنصران أساسيان في العملية الأكاديمية. حيث يُتوقع من الطلاب خلال سعيهم لتحقيق أهدافهم الأكاديمية التحلي بالأمانة والأخلاق في جميع الأوقات، وذلك وفقاً للوائح والأنظمة الخاصة بطلبة جامعة البحرين، بالإضافة إلى دليل حقوق الطلبة وواجباتهم، وكما جاء في سياسة الانتحال الخاصة بجامعة البحرين. حيث سيتم التعامل مع أي انتهاك للنزاهة الأكاديمية بحسب ما تنص عليه السياسات والأنظمة السابق ذكرها. |
